

Gulfstream III

The Gulfstream III is the world's first intercontinental business jet. The GIII outperforms the midsize competition providing speed, cabin comfort, range and value. Its solid design and performance qualities offer its operators an effective platform for conducting business.

Capable of carrying 8 passengers, a crew of three and baggage almost 3,700 nautical miles, the GIII set the standard for efficiency and versatility and continues to influence the corporate aviation industry.
