

Citation CJ1

The CJ1 provides remarkable flexibility. Its runway performance lets you get in and out of airports as short as 3,280 feet at maximum takeoff weight. In addition, its trailing-link gear ensures cat-soft landings on even the roughest of runways.

The CJ1's interior was created by the same team that designed the midsize Citation interiors. The clean lines, rich materials, recessed aisle, and extra headroom and elbowroom rivals aircraft costing many times more.
